

GOOD MOVES #20

Neo in the Now

RENAULT
TRUCKS

Solutions for industrial mobility

Neotrucks recycles and transforms heavy-duty vehicles into special equipment, dedicated to closed park logistics. An innovative approach that combines the circular economy with an optimised retrofit solution, implemented since 2023 at the Used Trucks Factory in Bourg-en-Bresse : 25 road tractors have been transformed.

What is a Good Move?

A Good Move is something that helps – or inspires us – at Renault Trucks to reach our ambitious goals of reducing CO₂ emissions.

Why is this a Good Move?

By recycling, adapting, and retrofitting existing road tractors into special handling vehicles, Neotrucks address societal challenges, helps decarbonizing the supply chain and reduce the carbon footprint that would result from manufacturing new vehicles.
