GOOD MOVE #21

Eco City: virtuous urban logistics

TRANSCAN is revolutionising urban logistics with Eco City. The company offers smart last-mile delivery using both peri- and intra-urban warehouses dedicated to grouping goods by destination, as well as 100% electric vehicles, trucks, LCV and cargo bikes tailored to the area served.

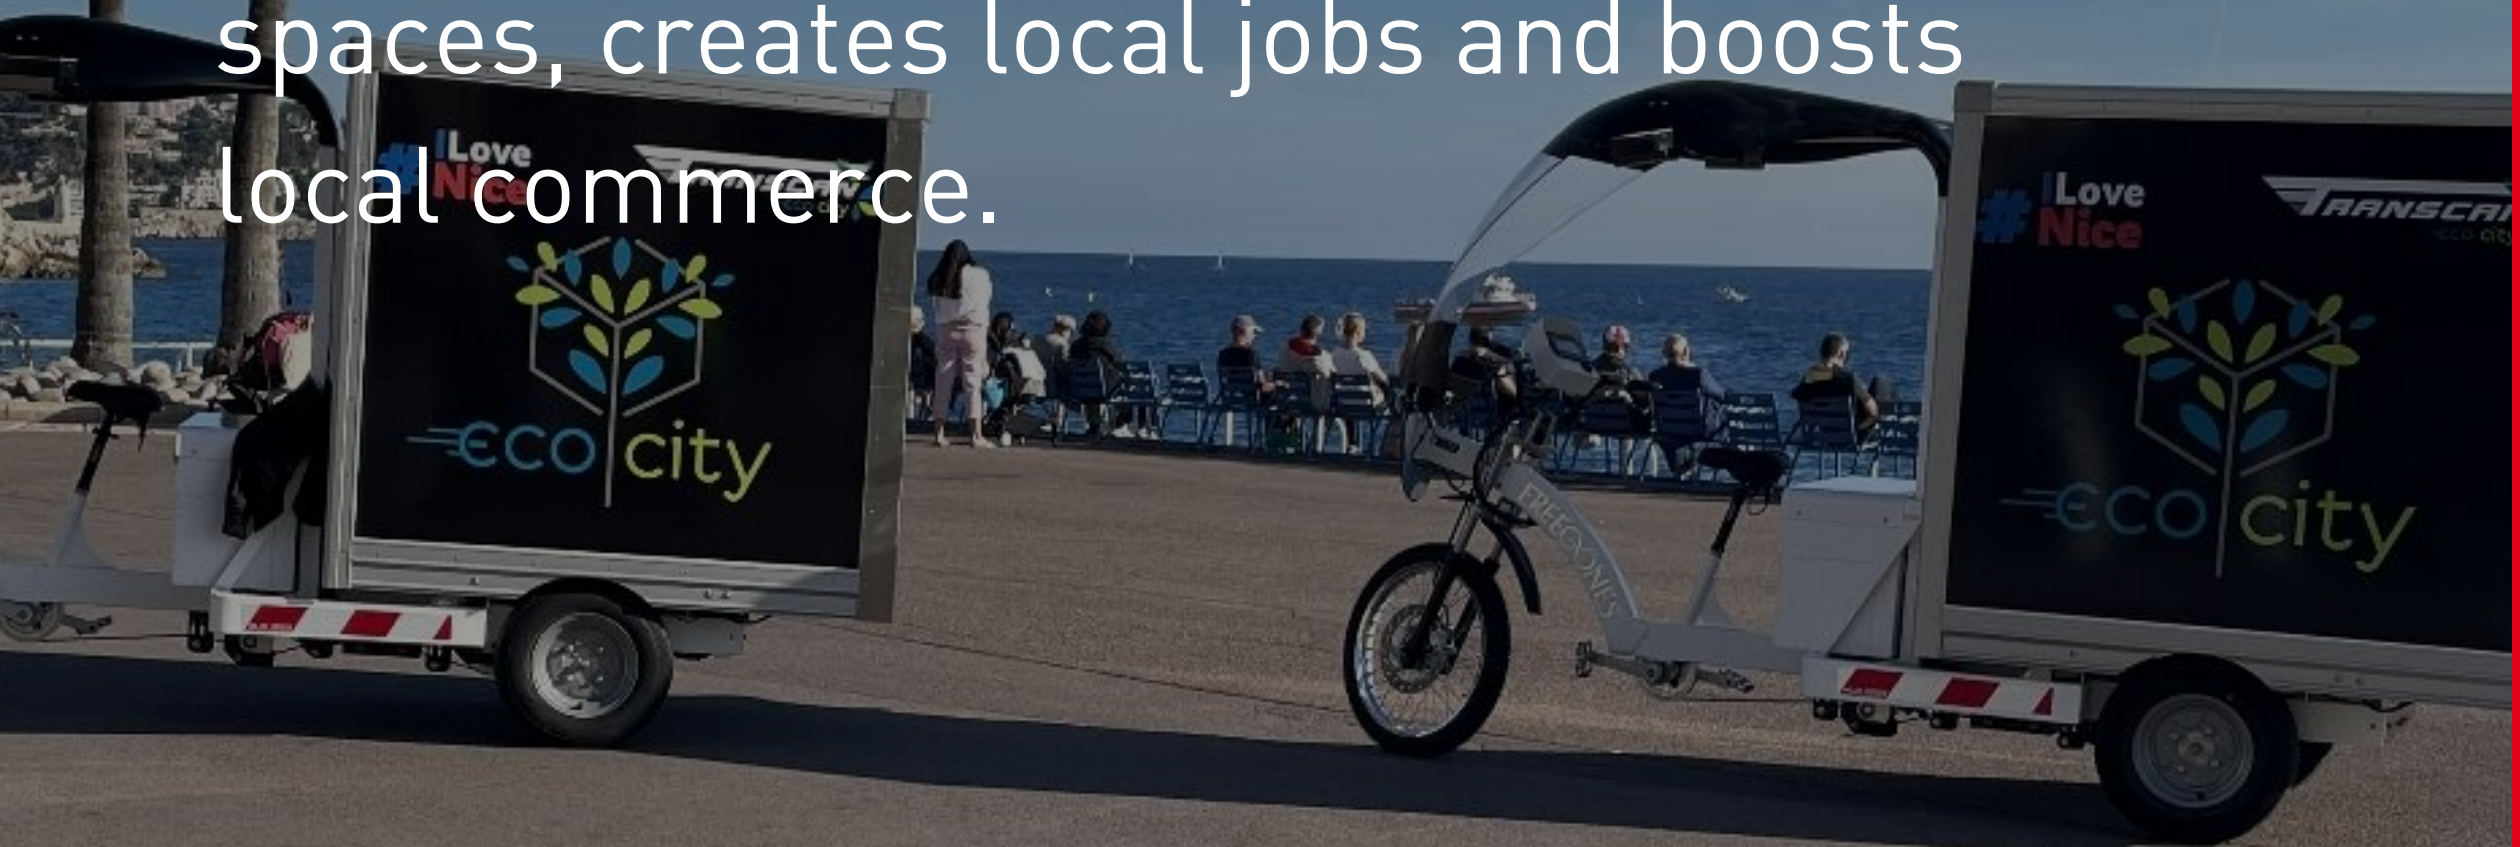

What is a Good Move?

A Good Move is something that helps – or inspires us – at Renault Trucks to reach our ambitious goals of reducing CO₂ emissions.

Why is this a Good Move?

By adopting a systemic approach to massification, transfer of goods and pooling of flows, TRANSCAN reduces CO2 emissions and noise pollution, relieves town centres and parking spaces, creates local jobs and boosts local commerce.
