

GOOD MOVES #22

Rest and recharge!

Milence paves roads for tomorrow

The Milence network, created in 2022 by the Volvo Group, Daimler Truck and the TRATON Group, is revolutionizing reliable, fast and accessible electric truck recharging. Two stations are already in operation in Heudebouville (France) and Venlo (Netherlands), and the network is constantly expanding, with seven new stations due to open in Germany, Belgium, France and Sweden by the end of 2024.

What is a Good Move?

A Good Move is something that helps – or inspires us – at Renault Trucks to reach our ambitious goals of reducing CO₂ emissions.

Why is this a Good Move?

By aiming 1,700 high-performance charging points by 2027, Milence is accelerating the transition to zero-emission road freight transport. A key initiative for a clean and sustainable future.
