

GOOD MOVES #25

580 km in a day: Can electric trucks really go the distance?

GOOD MOVE #25

The longest day!

The Renault Trucks E-Tech T, Diamond Echo, covered 580 km in a single day. The journey from Zurich to Cologne, made possible by a one-hour intermediate charge, was the longest stage of a European tour designed to demonstrate the operational feasibility of electric mobility.

What is a Good Move?

A Good Move is something that helps – or inspires us – at Renault Trucks to reach our ambitious goals of reducing CO₂ emissions.

Why is this a Good Move?

By covering more than 10,000 kilometres across 7 countries, the Diamond Echo is proving that long-distance travel by electric truck is not only possible, it's already a reality.
