

GOOD MOVES #26

# Le bond vers un transport décarboné au Chili

**RENAULT  
TRUCKS**

# **Worldwide transport solutions**

Three 26-tonne Renault Trucks E-Tech D Wide electric trucks have been delivered in Chile to the transport company Trailer Logistics. These vehicles will now be used for deliveries by CCU (Compañía de Cervecerías Unidas), Chile's leading brewer, to Santiago and the surrounding area, covering around one hundred kilometres every day and thus saving 628 tonnes of CO<sub>2</sub> emissions every year.

## **What is a Good Move?**

A Good Move is something that helps – or inspires us – at Renault Trucks to reach our ambitious goals of reducing CO<sub>2</sub> emissions.

# Why is this a Good Move?

In 2021 Chile has adopted an ambitious plan for sustainable transport, with regulations and incentives to develop electromobility. The arrival of the first three Renault Trucks electric trucks is paving the way in this country, which is a benchmark in this field in Latin America.
